

Devon AZTEC

CONVERSIONS LTD

The Aztec is based on the long wheel base, rear wheel drive Ford Transit, and has been designed to accommodate just two people in the most spacious and comfortable surroundings. The Aztec comes fully equipped and has a large shower-room with cassette toilet and fixed washbasin. In the kitchen there is a large stainless steel oven, grille and four burner hob with electronic ignition, a flush fitting stainless steel sink with glass top and an electric compressor fridge. The hot water is heated by either mains electric or gas and an Eberspacher diesel blown air heater is standard. There is a 110amp/hr auxiliary battery fitted which is charged via a power management system from the engine or the electric hookup.

The lounge consists of a large settee, a forward facing passenger seat (with 3 point seat belt) and a swivel cab seat. There are two single beds, both 6ft 4ins in length, which can convert into a large double bed 5ft 4ins wide.

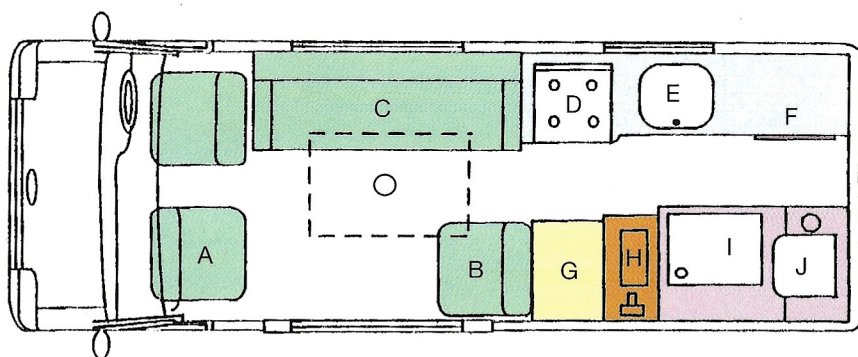

Storage is catered for with a large overcab cupboard, 6 overhead cupboards, a large wardrobe, kitchen cupboards and other storage areas.

Built on the high roof Transit, the Aztec has full headroom throughout, there is the structural integrity of an all steel rigid body, with a factory fitted steel roof and access through both the high rear and side doors. A large range of reasonably priced Ford factory fitted options are available. Among these is the Durashift automatic gear box with push button controls, traction assist to keep you moving on wet campsites, A.B.S., air conditioning and reversing sensors. Central locking is fitted as standard.

The conversion, as with all Devons is carried out to the highest standard by skilled craftsmen. The furniture is handmade in our factory from 15mm lightwood ply, giving extra rigidity and only the best of materials are used throughout. There is always a choice of upholstery from the latest fabrics and leather is available as an option.

Whilst being a most spacious motorhome the Aztec is only 6ft 6ins wide allowing you access to minor roads where width restrictions apply. With its comfortable car like driving position, smooth ride and a choice of the latest turbo diesel engines the Aztec is both a joy to own and drive.
