LIMOUSIN

The Limousin is based on the medium wheelbase Renault Master and is just 17ft 8in in length. It has a factory high roof giving it an integral steel body with full height side and rear doors.

The living area has a large comfortable settee with adjustable rake for the back rest, which folds down in one easy movement to make a double bed. Two single beds can be made by using the settee and the forward facing seat and joining them together makes a king-size double bed.

The forward facing seat is fitted with a three-point seat belt and both cab seats swivel. There is a free-standing table as standard, making a spacious and versatile living and dining area.

Opposite the shower compartment is the kitchen and the shower door opens across to this to form a complete partition providing a handy dressing area for when one steps out of the shower.

The kitchen is equipped with a stainless steel two-burner hob and grille with a matching sink, a Smev mini oven and a 65 litre compressor fridge. There is also a cutlery tray, a cup shelf and 230V and 12V sockets in the kitchen.

The Limousin is built to a high specification and standard equipment includes a diesel fired heater, which draws its fuel directly from the vehicle's 100 litre fuel tank. The Truma water heater works with both mains electric and gas and there is a variable rate mains charger for the 110AH leisure battery.

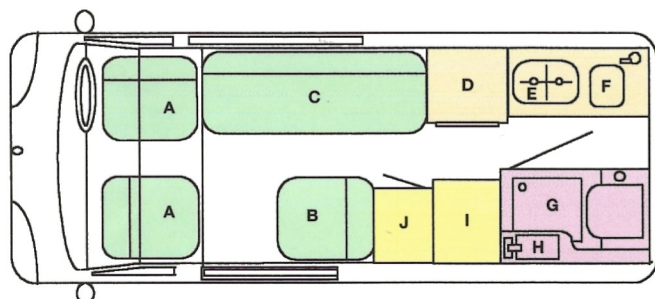

A mains cable is provided as are silver screens for the cab windows.

The Limousin excels on storage space with a large wardrobe, a large shelved cupboard, under settee and above cab storage, four roof cupboards, kitchen cupboards, under seat drawer and two magazine racks. The gas compartment holds 2 x 4.5 Calorgas bottles.

The Master van is also exceptionally well-equipped with ABS, driver's airbag, remote central locking, radio/CD player with fingertip controls and heated rear windows as standard. All Master vans are fitted with immobiliser and are alarmed to insurance company approved standard.

There are various factory fitted options available, including 6-speed automatic transmission, cab air-conditioning, passenger airbag and a choice of colours. Devon can fit all the aftermarket options, awnings, bike racks, televisions etc.

As with all Devons, the Limousin is built to the highest standards by our skilled workforce and is available from our factory at our competitive factory direct prices.
