

The Pasadena is designed to offer the most spacious and luxurious accommodation for just two people.

It is based on the long wheel base high roof Peugeot Boxer/ Fiat Ducato van. The base vehicles are available with a large range of engines, specifications and colours to choose from.

The layout comprises a large raised dinette across the rear which makes into a double bed. There is storage underneath the raised floor for chairs etc. and more storage in the large seat boxes.

Amidships is the kitchen with a full size built in stainless steel oven with grille, a four burner hob and electronic ignition. Alongside is a large stainless steel sink with flush fitting lid and a modern 12v compressor fridge is standard.

There is a full size shower room with a cassette toilet, tip up basin and pull out shower. Hot water is provided by a gas/mains Truma heater and an Eberspacher diesel blown air heater is also fitted as standard. This provides warm air to both the living area and the shower room.

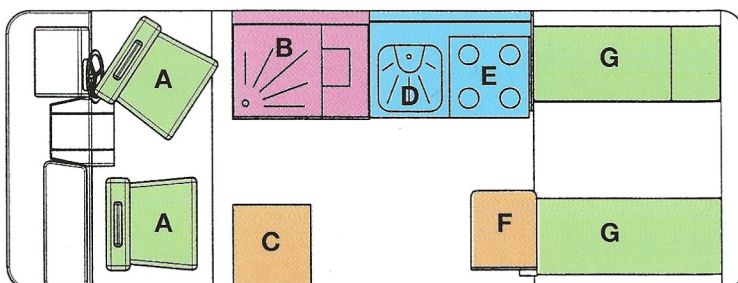

Both the cab seats swivel to form a useful lounging area in the front. The side windows are Seitz double glazed units with blinds and fly screens and internal silver screens are provided for the cab area. Alternatively the shower door opens out to partition off the cab area.

The furniture has an attractive light wood finish and is made in our factory by our skilled craftsmen from 15mm lightweight plywood to give strength and rigidity. Only top quality materials are used throughout and there is a choice of upholstery materials, curtains and floor coverings.

If you are looking for a little more comfort and space but within the confines of a van conversion which has the advantages of an integral steel body with full height side and rear doors, then the Pasadena could be just what you are looking for.
