CAMARGUE

The Camargue is based on a short wheelbase version of the Renault Master and comes with a factory high roof, giving an integral steel body with full height side and rear doors.

Although only 16 feet long, the Camargue has a full size shower compartment with cassette toilet, fixed hand basin and vanity unit allowing its occupants to be totally self sufficient when required.

Opposite the shower is the kitchen, furnished with a stainless steel two burner hob and grill, matching sink and a modern 12V compressor fridge.

Both cab seats swivel to make a large four seater dinette or two single beds in the front. The forward facing rear seats both have three point seat belts and head restraints, making the Camargue a full four seater, with rear passengers sitting just behind the cab where the ride is comfortable with an excellent view out.

The Camargue is built to a high specification and standard equipment includes diesel blown air heating, drawing fuel directly from the vehicles diesel tank, a Truma mains/gas water heater, mains hook-up, and 110A.H. auxiliary battery. There is an ample sized wardrobe, numerous roof cupboards, underseat drawers and a gas box for two 4.5kg Calor gas bottles.

All the furniture is made by experienced craftsmen in our own modern factory. All the main units are manufactured from 15mm lightweight plywood to give immense strength and longevity. All worktops and shower surfaces are bonded laminate for durability.

The Renault Master is also exceptionally well-equipped with drivers airbag, remote central locking, factory fitted alarm and heated rear windows. The superb 2.5litre 100BHP common rail turbo diesel engine is fitted as standard, as is a six speed gearbox. The Camargue also comes with radio, cd player, ABS, height adjustable cab seats and is covered by a three year warranty on both mechanical and habitation equipment.

For a very competitive price the Designer model also includes cab air conditioning, passenger airbag, electric windows and mirrors, rear parking sensors and mudflaps.

Although only the length of a large car, the Camargue is a motorhome designed to accommodate two people in luxury and with its first class washroom, offers so much more than most motorhomes of its size.
